# Action

What

- › "Action" is a pre-defined delegate, which can be used to create events quickly, similar to "Func".

- › The difference is:

  1. Func must have return value; Action don't have return value.

  2. Action must have 0 to 16 parameters.

How

Creating Delegate Based on Action
public Action<Param1DataType, Param2DataType, Param3DataType> referenceVariable;

Can be 0 to 16 parameters

[No return value]
